

Health and Safety Policy

Kiani beach Resort was established in 2007 to provide accommodation and leisure services to our guests. We are based in Kiani Akti and employ 70 people.

Health and Safety is important to our business because we value our guests and our employees. We are committed to continuous improvement and have established Health and safety procedures that provide a way for us to measure and improve our performance.

We have the following systems and procedures in place to support us in our aim of total customer and staff health & safety and continuous improvement throughout our business:

- a) Exit signs in bright colors.
- b) Exit plans in the guest rooms with the floor plan of the hotel.
- c) Fire extinguishers.
- d) Training and development for all our employees regarding fire safety.
- e) Exit plans in the common areas with the floor plan of the hotel.
- f) Training and development of our employees for first aid procedures.
- g) Full time life guards in the pool area.

Our internal procedures and equipment are reviewed and checked regularly and our quality objectives are communicated to all our employees through our Company Notice Board, email, team meetings and the staff handbook.

Though the General Manager has ultimate responsibility for health and safety regulations, all employees have a responsibility in their own areas of work, helping to ensure that safety is embedded across the whole property.
